ChatGPT Prompt: (Just copy&paste)

This is a comprehensive guideline for creating detailed and specific prompts for AI image generation.

The format is: "[STYLE OF PHOTO] photo of a [SUBJECT], [IMPORTANT FEATURE], [MORE DETAILS], [POSE OR ACTION], [FRAMING], [SETTING/BACKGROUND], [LIGHTING], [CAMERA ANGLE], [CAMERA PROPERTIES], in style of [PHOTOGRAPHER]"

Here are the key components listed as examples and not absolutes, to fill in each bracket:

STYLE OF PHOTO: Analog, candid, beauty, high fashion, instant, large format, glamor, lifestyle, paparazzi, pictorialist, Polaroid, use others not listed as an example as appropriate and/or for variation.

SUBJECT: Use terms like "teenage girl", "elderly man", "middle aged woman" to imply age and gender. The tag "age followed by a number" like "age 30" can further pin down age. Describe ethnicity and skin tone if relevant through tags like "caucasian", "African American", "fair skin", "olive complexion", etc. It's also important to add tags like cute, beautiful, attractive, serious before the ethnicity to create some variation in the faces it generates. Then include distinctive features like hairstyle ("short curly red hair"), clothing ("wearing a sundress"), expression ("smiling excitedly"), and accessories ("eyebrows pierced"). Unique details make the subject feel more like a specific individual.

FRAMING: Close up on the face, full body, head shot, upper body, from behind, use others not listed as an example as appropriate and/or for variation.

SETTING/BACKGROUND: Provide relevant contextual details but avoid being overly prescriptive. An example could be: "on the rocky edge of a cliff overlooking a misty forested valley at dawn".

LIGHTING: Bounced lighting, candid lighting, chiaroscuro, cinematic lighting, soft diffused lighting, edge lighting, fill lighting, flash photography, god rays, golden hour, use others not listed as an example as appropriate and/or for variation.

CAMERA ANGLE: Dutch angle, from above/high angle, from below/low angle, eye level.

CAMERA PROPERTIES: Aaton LTR, ARRI ALEXA 65, Bolex H16, RED Digital Cinema Camera, Canon EOS 5D, Fujifilm X-T4, Hasselblad X1D II, Lumix GH5, Pentax 645Z, use others not listed as an example as appropriate and/or for variation.

PHOTOGRAPHER: Choose a photographer that fits the style of the image. For example, "by Vivian Maier".

Be sure to try to make the prompt as cohesive as possible within each of the element parts. Subject and setting are usually the driver, feel free to be creative. You will ask me how many prompts I need and I will reply, you will adjust if I ask for any specifics in any of the modifiers.

Prompt #1:

Candid photo of a nightmarish entity, its form a grotesque amalgamation of flesh and bone twisted into an unnatural contortion. Oozing wounds weep with blackened ichor, staining the ground beneath it with corruption. Eyes devoid of pupils stare into the void with an insatiable hunger, while jagged teeth gnash together in a never-ending symphony of agony. The stench of decay hangs heavy in the air, suffocating all who dare to draw near. From behind framing. Shot with a Fujifilm X-T4 camera, in the style of Hieronymus Bosch.

Prompt #2:

Paparazzi photo of a sinister revenant, its spectral form flickering in and out of existence like a ghostly apparition. Tattered rags cling to its emaciated frame, swaying gently in the chill night breeze. Hollow eyes gaze out from beneath a cowl of darkness, their gaze piercing through the veil of the living world with an otherworldly intensity. Wisps of ethereal mist coil around its transparent limbs, trailing off into the darkness like tendrils of smoke. Full body framing. Shot with a Pentax 645Z camera, in the style of David Lynch.

Cinematic photo of a monstrous behemoth, its colossal form towering over the desolate landscape like a vengeful god. Jagged spines jut from its armored hide, gleaming in the dim light of a blood-red moon. Eyes, glowing with an infernal fire, burn with an insatiable hunger for destruction. Massive claws, each the size of a small house, gouge deep furrows in the earth as the creature lumbers forward on its relentless march of annihilation. Full body framing. Shot with a RED Digital Cinema Camera, in the style of Guillermo del Toro.

Prompt #4:

Glamor photo of a seductive succubus, her beauty a mask for the darkness that lurks within. Silken wings unfurl from her slender back, shimmering with an otherworldly iridescence. Eyes, pools of endless darkness, draw unwitting victims into her thrall with their hypnotic gaze. Ruby-red lips, curved into a wicked smile, promise ecstasy and torment in equal measure to those who dare to succumb to her charms. Soft diffused lighting casts a halo of ethereal glow around her enchanting form. Head shot framing. Shot with an ARRI ALEXA 65 camera, in the style of Tim Burton.

Lifestyle photo of a cursed doll, its porcelain features twisted into a grotesque parody of innocence. Eyes, glassy and lifeless, stare out from beneath a mop of tangled hair, their gaze devoid of emotion or empathy. Cracks spiderweb across its pallid skin, revealing glimpses of the darkness that lurks within. Soft diffused lighting casts a haunting glow around its sinister form, illuminating the depths of its unholy torment. Full body framing. Shot with a Hasselblad X1D II camera, in the style of Stephen King.
